pressed in order for the  
user to upload the file

## Transform your lecture materials into fun exam prep!

Description text - Introduces the page

File icon/  
graphic

file\_name\_1.pdf

Once the user presses 'upload file', they will be displayed with a file name and status which could state file uploaded successfully or failed

**NEXT**

CTA button, direct users to modal card overlay where they choose to generate a summary first or choose test type

## Summary:

Description text - Introduces the page

A wireframe of a summary generation page. It features a large, light gray rectangular area with rounded corners. Inside this area, there are six horizontal white bars of varying lengths, representing text input or placeholder text. The bars are stacked vertically, with the top bar being the longest and the bottom bar being the shortest.

The API will generate a concise summary to refresh users on the learning materials they have uploaded.

The summary will act as a refresher and once they are finished reading they can start creating a test based on the material they have uploaded

**CREATE A TEST**

CTA button, direct users to next page in which they can start creating a test

# LevelUp Study

The following wireframe shows the page where users pick their test type. Several cards will display all the different test types. The user picks one by simply clicking on the card.

**Title** - Displays clearly the name of the test type. For example, Multiple choice questions

Description text - Explains each test type briefly

**Title** - Displays clearly the name of the test type. For example, Multiple choice questions
